September 5, 2019

Dear Parent(s)/Guardian(s):

Chemistry is a Regents science course based upon the New York State Physical Setting Core Curriculum. The course has been developed to help students learn the essential elements of chemistry while also preparing them for success with the Regents Examination which is on Thursday, June 25, 2020.

Chemistry is a demanding course which requires extra reading and studying to learn the language and concepts. I encourage my students to spend a minimum of one-half hour each night studying and reviewing. This is in addition to any written homework assignments or laboratory reports. **Keep in mind that students must successfully complete all laboratory assignments in order to be eligible to take the final exam or the Regents Examination in Chemistry. All unsatisfactory laboratory assignments must be resubmitted by the end of each quarter. The required lab time must be completed by May 22, 2020. No labs will be accepted after that date.**

All tests and quizzes are announced well in advance. Students should be prepared to take them on test day. Please try to make doctor and other appointments with your student's schedule in mind. I am available for extra help and make up work.

I encourage you to review your child's grades via parent portal which is available for you to use. In addition, I hope that you will call me if you have any questions or concerns or just want to discuss your student's progress. I can be reached through the High School's main number or by email (prefer) pventurini@peekskillschools.org. When calling, please leave your name, number and a time for me to return your call. If your child is falling behind or not working up to ability, I will contact you for help in resolving any existing problems. I will make the same effort to call with good news.

I look forward to meeting you at the Peekskill High School Open House.

Sincerely,

Patrizia Venturini
