Peekskill City School District Educational Plan & Budget Workshop#2 January 22,2019 Ms. Robin Zimmerman, Assistant Superintendet for Business

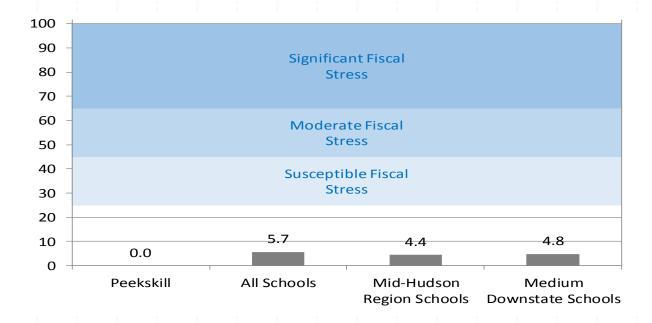

Agenda January 22, 2019

Comptroller's Fiscal Stress Report Card Balancing the Budget Revenues - Tax Levy Cap, State Aid, Reserves and Fund Balance Expenditures Budget Gap

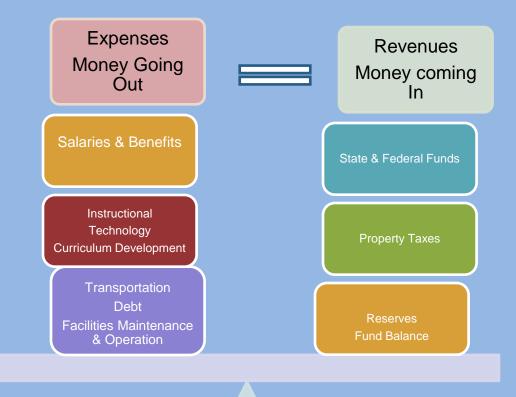

Fiscal Stress Summary

NYS Comptroller's - Fiscal Stress Score Peekskill City School District

Balancing the Budget

Understanding the Property Tax Levy Cap and why the tax levy can increase by more than two percent.

- New York's property tax levy "cap" has often been referred to as a "2 percent cap" on taxes by some politicians and the media. However, this is incorrect. The law does not restrict any proposed tax levy increase to 2 percent—or any other amount. Instead, the legislation requires each school district in the state to calculate its own "tax levy limit" to determine what level of voter support is necessary for budget approval. The figure "2 percent" (or the rate of inflation) is just one of eight variables that factor into each district's calculation of its individual tax levy limit as prescribed by law. If the tax levy increase is above the tax levy limit—after accounting for exemptions—the support of a supermajority (60 percent) of voters would be required for budget passage. If the levy is within the limit, a simple majority (50 percent + 1) is needed for budget approval.
- **DEFINITION:** The tax levy is the total dollars that a school district raises from property owners within the district in order to balance its budget. The levy is determined after accounting for all other sources of income, including state aid.

Understanding the property tax levy cap and why the tax levy can increase by more than two percent.

- DEFINITION: The tax rate is used to calculate what each property owner will pay in school taxes based on assessed value.
- Essentially, the "tax levy limit" sets a threshold that, if exceeded, requires districts to obtain a higher level of community support to pass a proposed budget. However, the legislation does not place a limit on the taxes a school district could levy to pay for expenses related to specific "excluded" items, including some court orders, some pension costs and local capital expenditures. The costs of these excluded items are added to the "tax levy limit" to come up with the "allowable tax levy" limit. The calculation recognizes that due to their nature, certain expenses should not be subject to a capped CPI-based growth index as our other expenses are capped.
- It is important to note that:
 - Tax levy limits will vary by school district;
 - This law does not limit an individual's tax bill.

Tax Cap - Let's Learn about the Numbers

- With all the talk of New York's "2 percent tax cap," it may come as a surprise to learn that each school district presents three separate tax levy numbers every year in order to comply with the law. Chances are good that none of those numbers will be exactly 2 percent, too.
- In 2015, none of the state's nearly 700 school districts had a 2 percent "cap." That's because the 2 percent figure is just one part of a complex formula that school districts must use to calculate two of their tax levy numbers, the tax levy limit and the maximum allowable tax levy. These numbers, which establish more of a threshold than a cap, help a district determine its proposed tax levy.

Tax Levy Numbers The three tax levy numbers under New York state's tax levy "cap"

The tax levy called for by a district's proposed budget. By definition, the tax levy is the total amount of money to be raised locally by a school district after factoring in available revenues.

If the district proposed tax levy minus exclusions is less than or equal to the district calculated tax levy limit, the approval of a simple majority of voters.

• Proposed Tax Levy

The tax levy limit tells a school district how much voter support it will need to pass a budget with its proposed tax levy.

The tax levy limit is the highest allowable tax levy (before exclusions) that a school district can propose as part of budget and needs the approval of a simple majority of voters (50% plus 1) to pass the budget.

If a district proposes a budget with a tax levy amount (before exclusion above this limit, will need the approval of a supermajority (60%) to pass the budget.

Tax Levy Limit

The maximum allowable tax levy is the tax levy PLUS certain exclusions. Taxes levied to fund the following expenses are excluded from the tax levy limit:

1. Voter approved capital expenditures

2. Increase in state mandated employer contribution rates NYSTRS and NYSERS systems that exceed two percentage points

3. Court order/judgements resulting from tor actions of any amount that exceeds 5% of the current levy

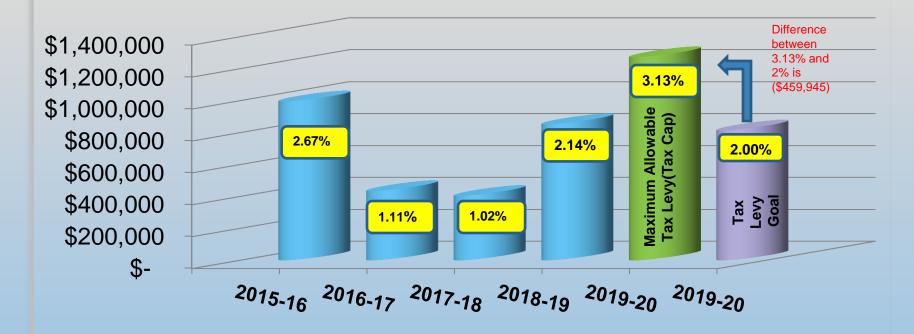

The district adds these exclusions to its tax levy limit without triggering the need for 60% voter approval

Maximum Allowable Tax levy

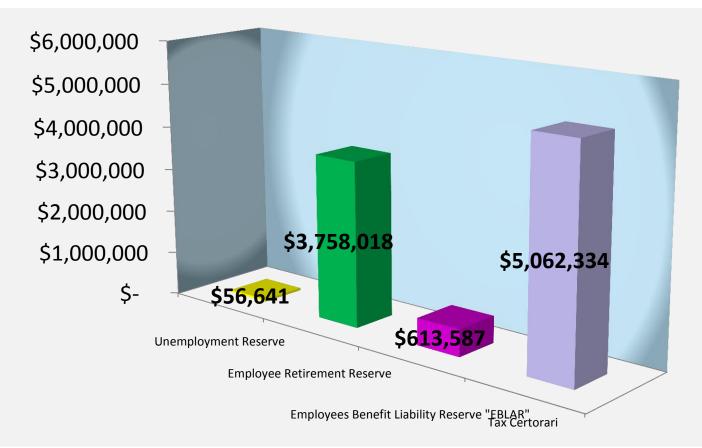

Tax Cap 2019-20
